PROFESSIONAL SUMMARY

Results-driven Flutter Developer specializing in building high-performance, responsive cross-platform applications for Android and Windows Desktop. Proven expertise in architecting offline-first applications using Clean Architecture, BIn-depth BLoC/Cubit state management, SQLite local persistence, and robust RESTful API integrations. Committed to writing clean, maintainable, production-ready code that delivers seamless user experiences in real-world commercial environments.

TECHNICAL SKILLS

Core Languages:	Dart, Flutter
Architecture & Patterns:	Clean Architecture, Repository Pattern, MVVM
State Management:	BLoC, Cubit, Provider
Local & Cloud DB:	SQLite, SQFlite, SharedPreferences, Cloud Firestore, Cloud Storage
Networking & Backend:	REST APIs, Dio, JSON Parsing, Firebase Authentication
Platforms & Tools:	Android, Windows Desktop, Git, GitHub, Figma, Postman

FEATURED PROJECTS

ModuPOS — Offline-First Point of Sale (POS) System

Flutter, Dart, SQLite, BLoC, Clean
Architecture, Dio

- Engineered a comprehensive, offline-first POS desktop and mobile application currently undergoing live operational testing in a commercial restaurant environment.
- Implemented Clean Architecture and Repository Pattern to ensure robust separation of concerns, scalability, and maintainability.
- Managed complex state reactively using BLoC/Cubit, delivering a high-speed, responsive cashier interface optimized for Windows Desktop and Android.
- Built an extensive relational offline SQLite database supporting comprehensive modules: Inventory, Product Catalogs, Suppliers, Customer Profiles with multiple addresses, and Order Management (Dine-In, TakeAway, Delivery, Order Hold).
- Integrated automated financial calculations, detailed sales reporting, invoice printing, and kitchen printing capabilities.

DocDoc — Healthcare Appointment Booking App

Flutter, Firebase, REST APIs, Clean
Architecture

- Developed a regional medical healthcare scheduling application featuring secure Firebase Authentication and Firestore backend integration.
- Designed a responsive UI adhering to modern design principles, ensuring seamless navigation across patient booking and doctor scheduling workflows.

Notito — Modern Note-Taking Application

Flutter, Firebase Cloud Storage, State
Management

- Built a cross-platform note-taking application featuring cloud data synchronization and media attachment storage via Firebase Cloud Storage.

TRAINING & CERTIFICATIONS

Flutter Intensive Training	2026
Information Technology Institute (ITI)	
Flutter Development Diploma	2026
AMIT Learning	

EDUCATION

Arab Open University	Expected 2028
Bachelor of Information Technology	

LANGUAGES

Arabic: Native | English: Professional Working Proficiency
